

Model Program Book

SEMESTER INTERNSHIP

Designed & Developed by

**ANDHRA PRADESH
STATE COUNCIL OF HIGHER EDUCATION**

(A STATUTORY BODY OF GOVERNMENT OF ANDHRA PRADESH)

PROGRAM BOOK FOR
SEMESTER INTERNSHIP

Name of the Student: E. Maheswari

Name of the College: S.V.B Govt degree College

Registration Number: 20358041006

Period of Internship: From: 17-11-22 To: 28-02-23

Name & Address of the Intern Organization

Sri Subramanyeswara factory in koilkunlla

RAYALASEEMA University

YEAR

TITLE NAME:

PRODUCTION OF POLYMER BAGS

An Internship Report on production of polymer bags in Sri Lakshmi polymers

(Title of the Semester Internship Program)

Submitted in accordance with the requirement for the degree of
Bsc (B.Z.C)

Under the Faculty Guideship of

Dr. H Rama Subba Reddy.

(Name of the Faculty Guide)

Department of

zoology

(Name of the College)

Submitted by:

E. Maheswari

(Name of the Student)

Reg.No: 20358041006

Department of zoology

S.V.B Goud degree college in loilkuntla

(Name of the College)

Instructions to Students

Please read the detailed Guidelines on Internship hosted on the website of AP State Council of Higher Education <https://apsche.ap.gov.in>

1. It is mandatory for all the students to complete Semester internship either in V Semester or in VI Semester.
2. Every student should identify the organization for internship in consultation with the College Principal/the authorized person nominated by the Principal.
3. Report to the intern organization as per the schedule given by the College. You must make your own arrangements for transportation to reach the organization.
4. You should maintain punctuality in attending the internship. Daily attendance is compulsory.
5. You are expected to learn about the organization, policies, procedures, and processes by interacting with the people working in the organization and by consulting the supervisor attached to the interns.
6. While you are attending the internship, follow the rules and regulations of the intern organization.
7. While in the intern organization, always wear your College Identity Card.
8. If your College has a prescribed dress as uniform, wear the uniform daily, as you attend to your assigned duties.
9. You will be assigned a Faculty Guide from your College. He/She will be creating a WhatsApp group with your fellow interns. Post your daily activity done and/or any difficulty you encounter during the internship.
10. Identify five or more learning objectives in consultation with your Faculty Guide. These learning objectives can address:
 - a. Data and Information you are expected to collect about the organization and/or industry.
 - b. Job Skills you are expected to acquire.
 - c. Development of professional competencies that lead to future career success.
11. Practice professional communication skills with team members, co-interns, and your supervisor. This includes expressing thoughts and ideas effectively through oral, written, and non-verbal communication, and utilizing listening skills.
12. Be aware of the communication culture in your work environment. Follow up and communicate regularly with your supervisor to provide updates on your progress with work assignments.

13. Never be hesitant to ask questions to make sure you fully understand what you need to do your work and to contribute to the organization.
14. Be regular in filling up your Program Book. It shall be filled up in your own handwriting. Add additional sheets wherever necessary.
15. At the end of internship, you shall be evaluated by your Supervisor of the intern organization.
16. There shall also be evaluation at the end of the internship by the Faculty Guide and the Principal.
17. Do not meddle with the instruments/equipment you work with.
18. Ensure that you do not cause any disturbance to the regular activities of the intern organization.
19. Be cordial but not too intimate with the employees of the intern organization and your fellow interns.
20. You should understand that during the internship programme, you are the ambassador of your College, and your behavior during the internship programme is of utmost importance.
21. If you are involved in any discipline related issues, you will be withdrawn from the internship programme immediately and disciplinary action shall be initiated.
22. Do not forget to keep up your family pride and prestige of your College.

-----<<@>>-----

Student's Declaration

I, E. Maheswari a student of Internship
Program, Reg. No. 20358041006 of the Department of zoology S.V.B gaut degree collage
College do hereby declare that I have completed the mandatory internship
from 17-11-2022 to 28-02-2023 in Sri lakshmi polymers (Name of
the intern organization) under the Faculty Guideship of
Dr. H Rama Subba reddy (Name of the Faculty Guide), Department of
zoology, S.V.B Gout Degree College
(Name of the College)

E. Maheswari / 26-01-2023
(Signature and Date)

Official Certification

This is to certify that P. Maheswari (Name of the student) Reg. No. 20358041006 has completed his/her Internship in Sri lakshmi polymers (Name of the Intern Organization) on production of polymer bags (Title of the Internship) under my supervision as a part of partial fulfillment of the requirement for the Degree of zoology in the Department of S.V.B Govt Degree college (Name of the College).

This is accepted for evaluation.

(Signatory with Date and Seal)

Lecturer in Zoology

SVB. Govt. DEGREE COLLEGE,

Koilkuntla-518 134. Kurnool (CL.)

Endorsements

Faculty Guide

Head of the Department

Principal

Certificate from Intern Organization

This is to certify that E. Maheswari (Name of the intern)
Reg. No. 20358041006 of S.V.B Goul (D) College (Name of the
College) underwent internship in Sri lakshmi polymers (Name of the
Intern Organization) from 17-11-2022 to 28-02-2023

The overall performance of the intern during his/her internship is found to be
Satisfactory. (Satisfactory/Not Satisfactory).

V. Ashok Kumar 26-04-2023
Authorized Signatory with Date and Seal

Acknowledgements

First of all, I would like to express my special thanks to Rayalaseema university of giving me this opportunity to do a new project like this program.

My zoology lecturer is my guide in this internship Dr. H. Ramasubba reddy. I express my special thanks to sir as a guide for me. I was able to successfully complete this internship with the suggestions, advice, and encouragement of H. Rama Subba Reddy sir. Also principal of our college. Dr. Keshav Rao sir we also special thanks, "Because we were given the opportunity to choose the project that come to us" and appointed a sir as our guide and encouraged us to make this internship a success. Also I would like express to thanks my attitude to the manager of the polymers factory.

I would like to devote my sincere thanks and attitude to the branch of the polymers factory their owner for giving need & opportunity for us. Also, I would like to express my attitude to the manager of the polymer factory who told us many things about polymers factory in this internship program. Because they spend their valuable time for us and patiently answered all the questions we asked about the process of the factory. I would also like to thanks all our friends. Because of their advice and suggestions.

Through these lines I would love to show my sincere gratitude to all the individual support this project is possible. I would like thanks to our lecturer, guideness Dr. Rama Subba reddy sir. He providing the support and guideness and help me the completing my report making it is useful to Every student.

Contents

Chapter - 1 : Executive Summary 09-10

Chapter - 2 : overview of the organization 11-12

Chapter - 3 :- Internship part 13-14

Activity of 1st week :- Counting the plastic bags 15-16

Activity of 2nd week :- collecting the wastage around the factory 17-18

Activity of 3rd week :- printing of ready made shaft 19-20

Activity of 4th week :- Recycling process 21-22

Activity of 5th week :- process of polymers factory 23-24

Activity of 6th week :- How to make a polymer bags 25-26

Activity of 7th week :- Brief introduction about factory work 27-28

Activity of 8th week :- Communicate to manager & workers 29-30

Activity of 9th week :- How to prepare polypropylenes 31-32

Activity of 10th week :- Different types of machinery 33-34

Activity of 11th week :- printing types in plastic bags 35-36

Activity of 12th week :- cutting and stitching 37-38

Activity of 13th week :- packing the plastic bags 39-40

Activity of 14th week :- marketing 41-42

Activity of 15th week :- How to develop the factory 43-44

Chapter 5 :- Outcomes description 45

Technical skills :- 46-47

Managerial skills :- 48-49

Communication skills :- 49-50

Group discussion & Communication :- 51-52

Technological developments :- 53-54

Student self evaluation :- 58-59

photo's and videos link :- 60-62

Evaluation :- 63-68

CHAPTER 1: EXECUTIVE SUMMARY

The internship report shall have a brief executive summary. It shall include five or more Learning Objectives and Outcomes achieved, a brief description of the sector of business and intern organization and summary of all the activities done by the intern during the period.

Sri Subramanyeswara polymers was established in year 2006 as a partnership firm. The main line of activity of the firm is manufacturing of pp woven sockets which are used in the packing of Cement, fertilizer, starch etc...

In 2006 the Company was established with capacity of 35,00,000 lakhs bags per month. Due to demand for the product, the Company has gone again into expansion in 2013 with capacity of 55,00,000 lakhs per month.

Gopireddy Surya Narayana reddy has been managing partners of the firm since its inception is having vast experience in the field of transport Business. He is having good contact with Cement Companies.

Marketing arrangements :-

The Company has tie-up with major Cement Companies for supply of bags. Since they are closely associated with many Cement Companies either as a dealer or transporters, selling the bags to the Cement is not all a problem for them.

position of firm :-

The turnover is expected to be 90 crores during current financial year

The turnover in the previous year has been 8.12 crores

The value of fixed assets of firm are 6.95 crores

The Sundry creditors of the Company are 11.15 crores

The total regular employees of the firm are 100 and salaries of employees will be around,

There will be daily labour of 300-400 numbers

The production capacity of the firm is 2.80 lakh bags per day

CHAPTER 2: OVERVIEW OF THE ORGANIZATION

Suggestive contents

- A. Introduction of the Organization
- B. Vision, Mission, and Values of the Organization
- C. Policy of the Organization, in relation to the intern role
- D. Organizational Structure
- E. Roles and responsibilities of the employees in which the intern is placed.
- F. Performance of the Organization in terms of turnover, profits, market reach and market value.
- G. Future Plans of the Organization.

A. Sri Subramanyeswara polymers in koiunkunta, kurnool is a top player in the category plastic bag manufactures in the kurnool. It is a partnership's Company.

B. mission the boarder polymer enterprise and its practitioners to meet the global challenges of today and the future vision is the premier professional organization promoting polymer science and its value of society.

C. The plastic bags management Rules 2016 aim to increase minimum thickness of plastic carry bags from 40 - 50 microns for plastic sheet also to facilitate collection and recycle of plastic wastage.

D. A manufacturing organizational structure is a system that outlines the hierarchy of roles and responsibilities in a company. The structure will differ from company to company.

E. Both natural and synthetic polymers namely

- (1) Linear structures
- (2) Cross-linked structure
- (3) Branched
- (4) Un-branched
- (5) Networking

Natural and synthetic polymers are remarkable involved in comfort and facilitation of human life.

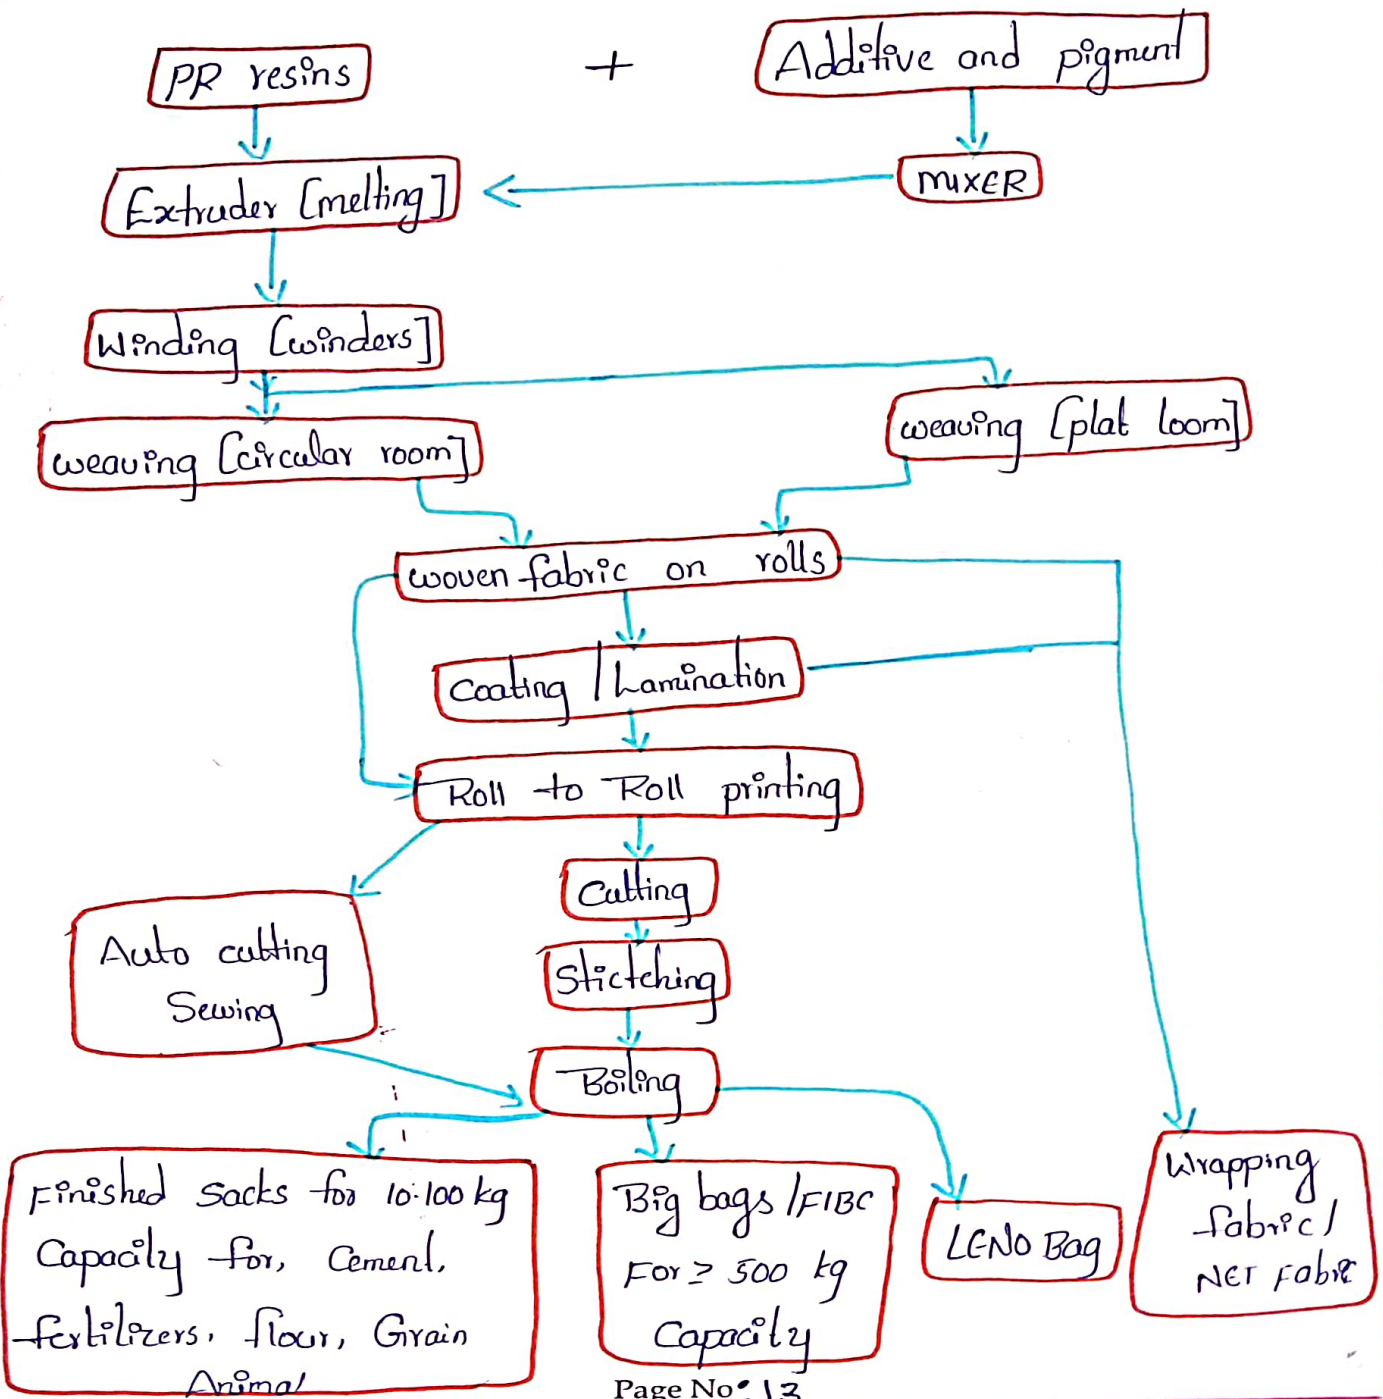

F. performance polymers process superior chemical, mechanical conditions. This organization in terms of turnover, profits, market reach and market value.

G. Energy resources mobility & infrastructure and communication.

It is also offers jobs in the public sector like in ONGC, GAIL and other known companies. The various jobs profiles are polymer engineers. etc.,

CHAPTER 3: INTERNSHIP PART

Description of the Activities/Responsibilities in the Intern Organization during Internship, which shall include - details of working conditions, weekly work schedule, equipment used, and tasks performed. This part could end by reflecting on what kind of skills the intern acquired.

Intern job duties vary by industry, but their common responsibilities include learning and becoming proficient in software, completing tasks assigned by their supervisor and attending meetings where they take minutes.

We are expected to contribute to day-to-day work at the organization. possible internship activities include attending departmental meetings; assisting a colleague with relevant tasks, attending client visits; organization part of a training course, workshop or lecture; and testing products or tools. Discuss progress and engage in discussion of topics relevant to the operation and philosophical perspective of the office and functional area in general.

Research, data capturing and working closely with different team members to learn more about the company.

Common intern duties and responsibilities include performing clerical tasks, doing research, creating presentation and shadowing employees. When hiring an intern, look for career goals that align with tasks and team environment and a strong work ethic.

ACTIVITY LOG FOR

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	We visit Sri Lalshuni Subramanyeswara factory in koilkuntla	we know this factory makes plastic bags.	V. Ashok Kumar
Day - 2	Counting the 100 bags are arranged in a bundle	Separation of damaged bags through the counting.	V. Ashok Kumar
Day - 3	Removing the bags more than 100 in a bundle	Each bundle have 100 bags.	V. Ashok Kumar
Day - 4	Separation of damaged and uncounted bags through the counting of a bundle.	Non-printing bags are removed from a bundle.	V. Ashok Kumar
Day - 5	Collecting the non-stitching and damaged bags from a bundle	we observe each bag stitching both sides	V. Ashok Kumar
Day - 6	Separation of "x" mark bags are counting in a bundle	we identified the "x" mark bags are not used	V. Ashok Kumar

WEEKLY REPORT

WEEK - 1 (From Dt.11.11.2022. to Dt.24.11.2022.)

Objective of the Activity Done:

Counting the plastic bags.

Detailed Report:

first we all visited Sree Lakshmi polymers factory. This factory is very spacious. we all observed around the surroundings of the factory. There are many big machines inside the factory. So many workers have worked in this factory. We observed this factory have many big trees around the factory. They look like a greenery. I observed this factory made plastic bags. The surroundings of the polymer factory the presence of greenery or green plants on the organization sides gives us a very pleasant atmosphere. The factory has many big trees so the factory release waste is not polluted the environment. Sree Lakshmi Subramanyeswara factory made plastic bags. These are counted as we counted each hundred bags are arranged in a bundle. Removing extra bags more than hundred in a bundle. Separation of unwanted and damaged bags. we counted many bundles. Each bundle has only hundred plastic bags. And Non-printing bags are removed in a bundle. we observe each bag stitched on both sides and see the correct stitching or not. and remove non-stitching bags. In a bundle x mark bags are not counted and these are not used.

ACTIVITY LOG FOR THE SECOND WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day -1	We are Consulted the head of the industry for the polymer factory	This internship we improved my skills.	Shob Kumar
Day -2	Collected the waste materials in front the factory	we observed which things are used in recycling process	Shob Kumar
Day -3	Threads are folded to bobbines that place we collect the waste material	Bobbins prepare that place are collected the worm used R. P.	Shob Kumar
Day -4	Collected the waste materials Back side of the factory	outside waste materials are also used Recycling process	Shob Kumar
Day -5	collecting the waste materials around the machinery	plastic waste materials are used recycling process.	Shob Kumar
Day -6	Collected wastage are used as recycling and prepare a new product.	Recycling process means old product to New product.	Shob Kumar

WEEKLY REPORT

WEEK - 2 (From Dt. 25.11.2022. to Dt. 01.12.2022.)

Objective of the Activity Done:

collecting wastage around the factory.

Detailed Report:

Recycling is the process of collecting and processing materials that would otherwise be thrown away as recycling trash and turning them into new products in recycling plant factory. we all observed the surroundings of the factory. This identified which area occupied the waste materials. Then we are collected the wastage in front of the Organization and learn which things are used recycling process. Fabrics are folded to threads bobbins. that place have heavy wastage are collected in the overall factory. These are used as recycling and produce new products. At the present life without polymer materials is difficult. not only for its usefulness but also economic importance. Despite of its undeniable daily usefulness polymers became waste and cause environmental problems in water, air and soil as well as in health. Investigations of waste polymer materials as fillers in Composite materials have been carried out modifications of the mechanical properties as well as density, water adsorption and chemical attack resistance has been obtained aggregates were used as partial replacements of natural sand to produced light weight mortars. these are used in recycling process.

ACTIVITY LOG FOR THE THIRD WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	fabrics are used to make plastic bags.	we learn how are made plastic bags	✓ Ashok Kumar
Day - 2	we observed ready made fabrics are folded as rollers	Easy to printing through folded with roller	✓ Ashok Kumar
Day - 3	Rollers are attached the printer machine	we observe rollers are attached to printer - the printing	✓ Ashok Kumar
Day - 4	Which stamp put on the bags after knowing the Customer's wish	we know bags are printed	✓ Ashok Kumar
Day - 5	printed bags are stitched up through the stitching machine	I noticed double stitching on both sides of the bags	✓ Ashok Kumar
Day - 6	100 bags in a bundle is Sewing bags is done and delivered to the customers	we know that it will be sold to Consumers.	✓ Ashok Kumar

WEEKLY REPORT

WEEK - 3 (From Dt. 22.12.2021 to Dt. 28.12.21.)

Objective of the Activity Done:

printing of ready made stuff's.

Detailed Report:

plastic is an amazing material with many wonderful properties and varied used but it can be really thick to print on. There are hundreds of different plastics in existence each with its own composition and characteristics. Our experience with printing on to plastics is with flat sheet signage folders, ring binders luggage tags but there are thousands of other useful items that plastic is suited to not necessarily "single use disposable" products with several different plastic printing methods out there it can be difficult to know which process is the best suited to a particular applications.

(1) Digital ink jet printing

(2) Screen printing

(3) Flexo printing

(4) UV litho printing

(5) pad printing and laser printing.

In Digital inkjet printing is one of the best methods to ensure high quality images that can be printed on to the several different plastics, minimal set up is required for this although the inks are expensive since they evaporate dry, leaving their mark behind rather than soaking into the material as regular paper inks.

ACTIVITY LOG FOR THE FORTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	collected waste materials are taken to the recycling/ factory.	we know wastage can be produced New ones.	✓ Ashok Kumar
Day - 2	collected waste materials are crushed into small pieces with the help of grinding machine	we know how much quality to take the waste materials.	✓ Ashok Kumar
Day - 3	Grinded waste materials connected with recycling plant with the help of plastic pipe	we observe non melting materials remove from incubator	✓ Ashok Kumar
Day - 4	polypropalene crystals are formed through the melting of waste materials	we tested quality of polypropalene	✓ Ashok Kumar
Day - 5	The waste materials dissolved by incubator through melting	We observe how to dissolve the waste material	✓ Ashok Kumar
Day - 6	prepared polypropalene crystals are transport the factory to generate New products	How to waste materials to recycling.	✓ Ashok Kumar

WEEKLY REPORT

WEEK - 4 (From Dt. 09.12.22.. to Dt. 15.12.22..)

Objective of the Activity Done:

Recycling method / process

Detailed Report:

pre-collected waste materials are transported to the recycling factory for recycling process

The waste material which is transported to the recycling factory is first small pieces with the help of grinder machine

Grinded pieces are sent to recycling plant with help of plastic pipe.

In the recycling plant, the modified waste material slightly changed into smaller pieces.

In the recycling plant, the modified the waste materials are dissolved with the help of incubator

When the waste materials are dissolved in the better. the melted plastic is removed to the side.

The waste materials like not melted plastic and again put in a grind machine. In addition, the waste materials dissolved by the mixture are formed in the polypropylene crystals

polypropylenes are again sent to the recycling plant to improve the theirs granule quality

The old polypropylene crystals are transported to the polymer factory to made up of bags are formed.

ACTIVITY LOG FOR THE FIFTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	polypropylene & some raw material by combining the mixture & heated to form fabric	we know to form fabrics through the melting process	✓ Ashok Kumar
Day - 2	fabrics are folded with bobbins with the help of workers	Don't waste much through the fabrics - folded bobbins.	✓ Ashok Kumar
Day - 3	This process workers do their work perfectly	So many workers helps this job to lead their life	✓ Ashok Kumar
Day - 4	Small bobbins are arranged a weaving machines	round bobbins are attached to machines	✓ Ashok Kumar
Day - 5	bobbins in thread now converted into fabrics / shaft	A machine converted to fabric to shaft	✓ Ashok Kumar
Day - 6	These fabrics are converted folded to rollers	Don't waste the shaft so easily arrange in rollers.	✓ Ashok Kumar

WEEKLY REPORT

WEEK - 5 (From Dt..16.12.22.. to Dt..23.12.22..)

Objective of the Activity Done:

process of polymers factory.

Detailed Report:

We visited Sri Subramanyaswara polymers factory in kaikkunthla. This factory made or prepare a New plastic bags. In first step to prepare a New polymer bag. polypropalene granules were used for making woven fabric. It is use for making sacks and wrapping fabrics. The minimum number of machines required to set up the plant was in between the range of 10 to 20 than manufacturing process of various pack tech products were studied which included polypropalene woven fabric and Sacks. FIBC, leno bags, pp woven wrapping fabric and Shopping bags. Generally, all the pack-tech products were manufactured and printed as the customer's demand. Different kinds of colour combination and designs in the printing of these Sacks are used to convey the messages, characteristics quantity and quality related details and handling instructions etc., The process of manufacturing polypropalene woven fabric and Sacks leno bags, wrapping fabric involves following steps

a. Extrusion

b. Weaving

c. Finishing and Sticking.

ACTIVITY LOG FOR THE SIXTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day -1	The large shaft are formed big rollers with the help of roller.	Rolling shaft is easily to printing process.	Atahat kun
Day -2	Big rollers are attached to the printing machines	This ways to print easily.	Atahat kun
Day -3	shaft has printing by the customers wish	Consult the customer and which type of printing domain.	Atahat kun
Day -4	print shaft cut the particular size & perfect shape of the bag.	which size the polymer bags	Atahat kun
Day -5	Then stitching on both sides of the bag	We know How to stitch the polymer bags	Atahat kun
Day -6	Then finally plastic bags are packing & transport to the customers	we know in the factory how to prepare a plastic bag.	Atahat kun

WEEKLY REPORT

WEEK - 6 (From Dt. 24-12-22.. to Dt. 31-12-22..)

Objective of the Activity Done:

How to make a polymer bags

Detailed Report:

The raw material mix is prepared in a tray adjacent to the hopper. These granules form is fed to raffia tape manufacturing plant to obtain the tapes of polypropylene granules. The weaving of polypropylene woven fabric is carried out in circular looms which produce circular shaft of desired width. The rolls of woven shaft are carried out to the finishing and stitching section of the unit. The fabrics is first printed and then cut into desired size for stitching. For making Bopp tapes bonded fabric was passed through Sewing machine. Big rollers are attached to the Sewing machine their form shaft and these are folded in the big roller. These are attached to the printing machine and printing the bags to the customers wish and stitching the plastic bags on both sides and printing packing the polymer bags before this process stitched bags are counted and each 100 bags are arranged a bundle. and non stitching and unwanted bags are removed these bags are not used and remaining are packing and transported to the ordered Company's and finally these bags are transported in our state & other countries.

ACTIVITY LOG FOR THE SEVEN WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day -1	when making polymer bags the next crucial phase of manufacturing process	convert the tube of polythene into collection of Bags	Atish kumar
Day -2	polypropylene granules are mixed with raw material and form fabric	granules are melting through a machine.	Atish kumar
Day -3	-fabrics are converted into shaft through a machine	shaft are prepare is not easy.	Atish kumar
Day -4	These shaft roller attached to printing machine to print bags	we know how to print the plastic bags.	Atish kumar
Day -5	printing bags are cut and stitched.	we know both sides are stitched the plastic bags	Atish kumar
Day -6	After stitching bags are packing & transport to customers.	finally do their work & customers wish.	Atish kumar

WEEKLY REPORT

WEEK - 7 (From Dt. 01.01.23.. to Dt. 07.01.23.)

Objective of the Activity Done:

Briefly introduce to factory's work.

Detailed Report:

polymer processing technologies are the processing in which monomer and converted into a finished product via chemical reaction, shaping, Compounding and via so on. Sometimes different additives and fillers are added during polymer processing to improve of properties of the required polymer product. Raw biomass materials such as lignin, cellulose, and fatty acids are low-cost readily available and chemically modifiable. The polymer factory is very spacious we all are observe surroundings of the factory. So many workers has worked in the factory. we observed in this factory have many big trees around the factory. This factory look like greenery and pleasant atmosphere. This polymers factory made plastic bags. This factory have work so many peoples. Sri Subramanyeswara polymers factory made plastic bags and recycling the wastage and prepare polypropylene granules. These are prepared about their wastage. This cause polluted atmosphere. But the wastage reuse so this not polluted to Environment Surroundings.

ACTIVITY LOG FOR THE EIGHTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	collecting information about the organization vision and mission	we improve our Communicational skills	<i>[Signature]</i>
Day - 2	Observe the factory and collected data about their work	learned about Organization in work	<i>[Signature]</i>
Day - 3	They show the various kind of Raw materials clearly	we know which quantity to make a new bag.	<i>[Signature]</i>
Day - 4	The factory manager show and clearly explain in Company's work	we identified step-by-step in work	<i>[Signature]</i>
Day - 5	workers also briefly explain the factory's work	How to do work and their roles	<i>[Signature]</i>
Day - 6	They will explained clearly how much importance in bags.	learned about how to manufacture of p.bags.	<i>[Signature]</i>

WEEKLY REPORT

WEEK - 8 (From Dt. 08.01.23.. to Dt. 14.01.23..)

Objective of the Activity Done:

Communicate to manager & workers

Detailed Report:

Communicate with our manager and workers at work ① stay on the same page to be on the same page with your boss. you need to communicate. There is no shortcut the more spent together the easier it is for your boss to know if you are in same page. This results in a less stressful working environment.

2. Think ahead and offer solutions to problems

Communicating with your boss is similar to a game of chess. it demands staying three steps ahead of your opponent to take the lead

3. Offer suggestions that produce results

There are many things you can do to get a head in your career like getting educated. Not surprisingly, improving our skills

4. make your boss look good.

Since your boss is being judged, not only by their individual performance but also by the performance of employees the best way to make your boss look good is to make yourself is good.

Communicate effectively at work :- very likely your boss certain approach or style to effective internal c: skills

ACTIVITY LOG FOR THE NINTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Before usely fabrics are Grinded into small pieces	polypropalen are made old fabric material	Atul Kumar
Day - 2	Grinded small pieces are again grinding machine puts	fabrics are grinded with the help of grinding machine	Atul Kumar
Day - 3	Grinded fabrics are melted with attached a recycling plant.	How to melted fabrics to the recycling plant	Atul Kumar
Day - 4	Fabrics are dissolved by incubator through melting	In preparation of P.P are main thing incubator	Atul Kumar
Day - 5	Then small polypropalenes are formed. But they are in small size	Check to the quality polypropal granules	Atul Kumar
Day - 6	Small polypropalene are again melting and form quality polypropalene granules	In this manner to prepare granules	Atul Kumar

WEEKLY REPORT

WEEK - 9 (From Dt. 15.01.23. to Dt. 21.01.23.)

Objective of the Activity Done:

How to prepare p.p to waste materials.

Detailed Report:

polypropylene is a relatively easy material to injection mould in spite of its semicrystalline nature. The absence of any real need for high molecular weight, from the mechanical properties view point, leads to low melt viscosity. The pseudoplastic nature of polypropylene enhances this effect at high shear rates.

Typically melt temperatures for injection moulding are between 200 to 250°C. Though they can be as high for short periods of time. With flame retardant grades, it is recommended that 220°C is not exceeded. Mould filling rates are generally on the high side to ensure good surface finish and strong mouldings free of weld lines and flow fronts. Adequate venting of the mould is essential to prevent burn marks. Moulding shrinkage of polypropylene is typically around 1%, but prediction of the actual value is difficult due to the strong influence of moulding conditions. Important factors which affect the shrinkage of polypropylene mouldings include these polypropylenes are prepared to waste materials and used recycling process to produce and new polymer bags.

ACTIVITY LOG FOR THE TENTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day -1	we saw about the new equipment in Industry	We know how to work factory	Ashok Kumar
Day -2	We know the machines names and which type of do work.	we know the information of machinery	Ashok Kumar
Day -3	We understand the advantage and dis-advantages of the factory	we know many critical thinking to develop.	Ashok Kumar
Day -4	we are learning about the equipment and its functions	How to work their equipments	Ashok Kumar
Day -5	we work with their workers and learn their work	We improve our skills.	Ashok Kumar
Day -6	we develop communication skills by the interaction of workers	This is a socialization factory.	Ashok Kumar

WEEKLY REPORT

WEEK - 10 (From Dt. 22.01.23. to Dt. 28.01.23...)

Objective of the Activity Done:

different machines of the factory.

Detailed Report:

The general term of various machinery and devices used in the plastics processing industry. Certain general-purpose machinery equipment such as fluid and solid conveying, separation, crushing, grinding and drying also occupy an important position in the plastics processing industry. So they are often listed as plastic machinery extruder, Injection molding machine, film blowing machine, blow molding machine etc., According to the production process of plastic products, plastic machinery can be divided into four categories; plastic Compounding machinery, plastic Secondary processing machine and plastic processing auxiliary machinery or devices. plastic Compounding machinery is used in the manufacture is used in various forms of plastic Compounding materials including kneaders, plastic mixing machines, pelletizers, Screening machines, crushers and grinders plastic molding machinery, also known as plastic primary processing machinery, is used for the molding machines, extruders, blow molding machines, foaming machines, plastic Secondary processing and post-processing and plastic Semi-products or products including thermoforming, welding machines and other many machines are used.

ACTIVITY LOG FOR THE ELEVENTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Ready made shaft rollers to prepare printing through printing machine	During rollers printing process is less time taken	Atul Kumar
Day - 2	In Digital jet ink printing is used in polymer factory	we know this is best method	Atul Kumar
Day - 3	Another type of printing is flexo printing	This printing is essentially modern version.	Atul Kumar
Day - 4	Screen printing are looking to obtain a boldness of colour	It is dried under uv light sock in the colour	Atul Kumar
Day - 5	uv lithio printing is used to quality images or letters are printed	This is more versatile methods of printing	Atul Kumar
Day - 6	So many printings are available in nowadays	we know printing is very important in polymer bags.	Atul Kumar

WEEKLY REPORT

WEEK - 11 (From Dt. 29.01.21 to Dt. 04.02.21..)

Objective of the Activity Done:

Different types of printing in plastic bags.

Detailed Report:

Inkjet printing If you are printing in a small run, you could possibly take advantage of inkjet printing to create custom shipping bags. This doesn't mean running it through your home Computer printer, but rather than you would use a special handheld printer that would imprint on the envelope. keep in mind, this may not be your best technique if you have a detailed image you want to put on the bag.

Screen printing :- Screen printing uses premixed ink call Spot colors for printing. A screen is placed between the plastic bag and the brush or printer to transfer the logo. The screen contains the inverse of the image to be printed. The image is transferred by spreading the ink across the screen.

Digital printing :- Digital printing allows you to print in all colors. The image is printed by digital printer that uses ink, which is technologically controlled. Digital printing is expensive but perfect for detailed printing like litho printing, flexo printing. So many different types of print to plastic bags in polymers factory.

ACTIVITY LOG FOR THE TWELVETH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	We consult the organization manager & How to work in their factory	He is very well Says about this process of factory	Atish Kumar
Day - 2	Which size cut to shaft prepare a plastic bag	Different types of bags are cutted with different methods	Atish Kumar
Day - 3	How much long in length we know about he says	Everything choose carefully & observe	Atish Kumar
Day - 4	In Each bag are stitched 30x20 inches both length & width	In 50 kg bags have this type of sizes	Atish Kumar
Day - 5	Then cutting bags are stitching on both sides	After cutting the bags are shift to stitching machines	Atish Kumar
Day - 6	Both sides are double stitching to stitch then any material don't loss	How to stitch both sides in polymer factory	Atish Kumar

WEEKLY REPORT

WEEK - 12 (From Dt. 05.02.23.. to Dt. 11.02.23..)

Objective of the Activity Done:

Cutting and stitching of polymer bags.

Detailed Report:

In polymers factory ready made shall cutting and stitching process is very important and it is very critical situation. Both works not easy and how much size. The automatic cutting and sewing machines added with Computer numerical control can produce huge quantity of bags with variation in size with a tremendous speed and efficiency in short period.

A common facility testing centre should be setup by the government for manufacturing units to provide necessary testing and certification to meet international demand.

The increasing demand for these products ensured a bright future for this industry in the market demand the growing marketing textiles packing for the production process of polymer bags.

These bags are sustainable the process it is part of the chemical industry. In addition a mineral oil is the major constituent of the plastics therefore forms part of the petrochemical industry.

ACTIVITY LOG FOR THE THIRTEENTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	packing is one of most important work in polymer factory	we are Communicate with workers	Abhishek Kumar
Day - 2	High density polythene are commonly used in packing	which type of material is used in this process	Abhishek Kumar
Day - 3	polyethylene terephthalate is one of the mostly wide in packing process	we identified which is best for packing Section	Abhishek Kumar
Day - 4	polyvinyl chloride chemical is used to the production of secondary packaging	which chemical is used to the Secondary production	Abhishek Kumar
Day - 5	In packing films from microbial attack and has such stiffness	How to protect their products	Abhishek Kumar
Day - 6	These are added to waterproof, strong & help their shape.	How to don't change their shape and strength	Abhishek Kumar

WEEKLY REPORT

WEEK - 13 (From Dt.12.02.23.. to Dt.18.02.23..)

Objective of the Activity Done:

packing of the plastic bags

Detailed Report:

A plastic bag, poly bag, or pouch is a type of container made of thin, flexible, plastic film, non-woven fabric or plastic textile. plastic bags are used for containing and transporting goods such as foods, produce powders, ice, magazines, chemicals, and waste. It is a common form of packaging.

most plastic bags are heat sealed at the seams, while some are bonded with adhesives or are stitched. many countries are introducing legislation to phase out light weight plastic bags because plastic never fully breaks down, causing everlasting pollution of plastics and environmental impacts. Every year about 1 to 5 trillion plastic bags are used and discarded around the world from point of sale to destination. plastic bag have a life time of 12 minutes. Approximately 320 bags per capita were used in the year 2014. Several design options and features are available. Some bags have gussets to allow a higher volume of contents. special stand-up pouches have the ability to stand up on a shelf. Some have easy-opening or reclosable options.

ACTIVITY LOG FOR THE FOURTEENTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	marketing is depends on their quality of polymer bags	we know how to choose quality	Atish Kumar
Day - 2	These are based on the product type.	which products to use to become more benefits	Atish Kumar
Day - 3	This marketing is basis of end use industries	most-popular industry es their product marketing in such prize	Atish Kumar
Day - 4	It is regionally Based on outlook of Bags.	we understand our look is beautiful to market many bags	Atish Kumar
Day - 5	Some key player operating in the global polyethylene bags	Some of the members are selected for this type of roles.	Atish Kumar
Day - 6	Dynamics is the most important in marketing process of polymer bags.	printing tool is branding & promotion of polymer bags.	Atish Kumar

WEEKLY REPORT

WEEK - 14 (From Dt. 19.02.23. to Dt. 25.02.23.)

Objective of the Activity Done:

marketing of the polymer industry.

Detailed Report:

The most common use for a market bag is used as a bag to carry your items around. Furthermore, as an exchange bag to bring along for when you run errands or go antiquing. I also like to use a market bag to house items that I like to have nearby but also concealed. We might also offer bags to people attending high profile fashion shows and similar events. We store try advertising in local circulars and magazine and offering discounts to customers who bring their friends. Keep your storefront attractive and ensure the handbags are visible from the street.

Improved brand recognition :-

Promotional tote bags are beneficial because they effectively act as walking billboards, increasing brand visibility everywhere they go. Traditional plastic bags are usually made from polyethylene, which consists of long chains of ethylene monomers. Ethylene is derived from natural gas and petroleum. These are marketing in polymer industry. This method used as a bags to stored and choose high quality of an fabric. Those bags are high marketing.

ACTIVITY LOG FOR THE FIFTEENTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day -1	In polymer factory is one of the most popular in leunool district.	It is a big & very popular factory in leunool	Ashok Kumar
Day -2	Their manger do continous training to workers	managers and workers like friends and do work	Ashok Kumar
Day -3	Encouraging safe working area of all workers	Team work is important to improve development	Ashok Kumar
Day -4	creating a work safety team & collaborate each member	collabrate skills are improve	Ashok Kumar
Day -5	provides a comfortable working Environment	Always thinking about workers safety	Ashok Kumar
Day -6	Reduce distractions around workers and they do small mistakes don't hunger	This type of distractions reduce to achieve in Na position	Ashok Kumar

WEEKLY REPORT

WEEK - 15 (From Dt. 24.02.23.. to Dt. 28.02.23..)

Objective of the Activity Done:

How to manage / develop the factory.

Detailed Report:

These steps involved in a setting up a plastic manufacturing Company 1. Create a plan 2. Decide on the size of Business 3. Research well 4. choose the perfect location

There are numerous harmful effects, but we still can't resist using them. This material is very cheap and there's a never ending range of things that we can make using plastic. Almost all fields are somewhere down the line depending on plastic.

Only you know your knowledge level financial strength resources and goals. So you'll be the best person to decide the size of your business. Remember you are just starting. If you begin working on bigger than reality plans you may suffer. Think about real-life possibilities and start by establishing your business on a small

Scale and Research well. The plastic manufacturing venture demands good enough investment and to avoid business blunders, you need in depth research. Besides understanding the demand / supply chain, you should know the functioning of the market, possible chances of losses.

Be an Expert starting and manufacturing needs adequate knowledge. Go to this type to develop the plastic manufacturing Company.

CHAPTER 5: OUTCOMES DESCRIPTION

Describe the work environment you have experienced (in terms of people interactions, facilities available and maintenance, clarity of job roles, protocols, procedures, processes, discipline, time management, harmonious relationships, socialization, mutual support and teamwork, motivation, space and ventilation, etc.)

We all are going to Sri Lakshmi Subramanyeswara - polymers. we're asking questions about the processes that take place in the factories and how they are made plastic bags. we are talking about the process to their workers. workers are about say in polymer factory process clearly explained. this factory achieve great success with the support of workers. they are regularly and sincerely work do their works. In this factory have other state peoples have good opportunities and other state peoples are worked in majority to compare our state.

In these workers regularly worked from 10:00 Am to 6:00 PM and half of the workers have Night shift's their timings are 6:00 pm to morning or Next day 10:00 Am. So. this

Factory has not stopped. Every-time should do work In Every day workers work do hard. their timings are perfectly followed Daily work are managed properly and this factory leads to Number one position. In this factory women's are also work in polymer's factory. their also treated friendly manner and made us aware about polymers factory. A polymer factory is not one or two peoples operation. A whole team workers are do their work sincerely. A factory itself depends largely on the workers. we all are noticed that the worker working there is also working very skillfully. In this factory is one of the famous working factory in whole kurnool district. The location of a polymer factory has spacious area and surrounded by large trees and this factory has a pleasant atmosphere.

Describe the real time technical skills you have acquired (in terms of the job-related skills and hands on experience)

polymer technologists work in the manufacture products made from polymers group of materials is made up of plastic bags and fabrics. polymers have special properties that make useful in the manufacture of a variety of products. They are many technical skills are improved us.

(1) New and improved skills and how to apply them.

(2) professional communications

(3) Networking is important

(4) Taking constructive criticism well...

(5) Work hard no matter what we are doing.

(6) Independence.

(7) making connections

(8) you're more important than you think.

(9) Technical skills like technical writing, coding, adobe suite operations. ms office operations.

(11) Communication skill. occurs in a variety of ways, but future employers are primarily interested in your ability to write and speak professionally.

(12) Interpersonal skill

(13) collaboration skill

(14) Time management skill

(15) Adaptability skill

(16) critical thinking skill

(17) Research and Analysis skill

(18) Initiative skill

We are excited to hone my collaboration skills by working with others and to have the chance to see some glimpses into my future career path. "It can also help to discuss your willingness to grow and learn as professional when answering all the process about the factory and my technical skills.

Describe the managerial skills you have acquired (in terms of planning, leadership, team work, behaviour, workmanship, productive use of time, weekly improvement in competencies, goal setting, decision making, performance analysis, etc.

Management skills are abilities and traits needed to perform certain duties usually as it pertains to overseeing a team, such as solving problems, communication well and motivating employees. Such skills can be learned through practical experience, or in courses and then honed on their internship. These skills are us acquired. Interpersonal skills are necessary across industries. These are essential to maintaining good relationships and team spirit, while, technical skills enable managers to knowledgeably coach new team members. Management skills are necessary across industries; managers can be found in investment firms, start ups, bars and restaurants, government agencies and more. Here is a list key management skills you might consider for our internship.

(1) Leadership

(2) project management

(3) planning

(4) Delegation

(5) Coaching

(6) Negotiating

(7) Empathy

(8) Interpersonal skills

(9) Communication

(10) problem Solving

(11) coordinating

(12) Organization

(26) problem Solving

(13) Conflict resolution

(14) Strategic thinking

(15) public speaking

(16) Logistics

(17) Technical knowledge.

(18) Networking / out reach

(19) collaboration

(20) Execution

(21) Decision making

(22) Innovation

(23) Teamwork

(24) prioritizing

(25) Decision making

(27) Verbal communication.

Listing these skills is not enough. To demonstrate

to a potential employer that you have the management

skills to succeed, you will want to illustrate how you

managed a team and how much impact you had, so

that my internship report is a competitive applicant pool.

Describe how you could improve your communication skills (in terms of improvement in oral communication, written communication, conversational abilities, confidence levels while communicating, anxiety management, understanding others, getting understood by others, extempore speech, ability to articulate the key points, closing the conversation, maintaining niceties and protocols, greeting, thanking and appreciating others, etc.,)

During an internship, you are required to communicate with your team members regarding the project work. Improve in oral communication, written communication, conversational abilities, confidence levels while communicating, anxiety management. you are working on and with your clients / customers. Performing these tasks help you learn various aspects of communication and sharpen your verbal as well as written communication. understanding others. They are generally four main areas of communication, emotional awareness and management, and questioning. Get to know your audience beforehand, Build rapport,

1. pay careful attention :-

Actively listen and take notes when receiving instructions. Show initiative by researching questions first

through company resources, and then ask your questions.

2. Have a positive attitude and show gratitude

Be willing to take any assigned task, no matter how small. You'll often find that excelling at the basics can lead to more responsibilities.

(3) practice two-way mentoring.

Find someone you look up to and want to emulate at your office. Get to know them and learn more about their career path and why they made the choices they have by volunteering to be a mentor to others.

(4) Expand your network

(5) Be open to feedback. Every so often, ask your manager how you're performing. What are you doing well? Once you have received feedback and willing to better yourself.

(6) Stay focused

(7) Be professional

(8) understand the office norms and internship industry.

(9) stay connected.

Describe how could you could enhance your abilities in group discussions, participation in teams, contribution as a team member, leading a team/activity.

We are enhance your abilities in group discussions. & group

Communication skills. These are

Be thoroughly prepared :- First of all, you need to interview the topics and materials to be discussed. As you are reading those documents, make notes

1. Respect the Contribution of other speaker
2. Listen well to the ideas for other speakers
3. Acknowledgement what you find interesting.
4. Remember that a discussion is not a fight.

participation in teams

- (1) know your goal people in teams are working towards a Common goal.
- (2) Clarify your roles within a team, everyone should also understand these responsibilities
- (3) positive mind set
- (4) manage time Efficiently.

Leading a team / Activity :-

- (1) practice discipline . A good leader needs discipline.
- (2) Take more projects . A great way to develop your leadership skills is to take or more responsibility
- (3) Empower your teammates
- (4) Inspire others
- (5) Develop situational awareness.

Enhance the skills of each student in a batch of internship

- (1) How can we improve teamwork in the workplace
- (2) clearly define roles and responsibilities for every team member.
- (3) Build trust within the team
- (4) Encourage clear, frequent communication
- (5) Give teams autonomy in decision-making
- (6) Don't be afraid to recognize team dynamics
- (7) provide the team with learning opportunities.

Describe the technological developments you have observed and relevant to the subject area of training (focus on digital technologies relevant to your job role)

The recent developments of polymer technology have revolutionized the field of material science increasing the use of polymer based substance from building materials to packing materials. polymer technology can be described as the manufacture processing, analysis and application of long chain molecules materials that are typical classified as polymers include plastics, paints, rubber foams, adhesive selections.

Technological training is an instructional method that employs technology to deliver content and facilitate learning.

- (1) AI Enhanced learning
- (2) Rapid upskilling and Reskilling
- (3) micro learning
- (4) prioritizing Communication
- (5) Reinforced and on. Demand learning
- (6) Technology trends in learning and development.

Here we explore some of those tools and how they can help companies deliver the training that will help companies deliver the training that will help employees become most productive

- (1) Learning management systems
- (2) Video conferencing tools.
- (3) Microlearning platforms
- (4) Content creation tools.
- (5) Hosted course platforms
- (6) Knowledge Repositories
- (7) Training tools support trainers

Technology allows you to understand how effective your training and development is by tracking employee knowledge before and after the process. It also lets you how well crafted your training. Technology offers ease of use, learning retention, dissemination of information, the ability to reinforce learning employee training convenience and a reduced impact on productivity.

Student Self Evaluation of the Short-Term Internship

Student Name: *E. Maheswari*

Registration No: *2058041006*

Term of Internship: From: *17-11-2022* To: *28-02-2023*

Date of Evaluation: *26-04-2023*

Organization Name & Address: *Sri Lokeshwari Polymers Factory in Kottur*

Please rate your performance in the following areas:

Rating Scale: Letter grade of CGPA calculation to be provided

1	Oral communication	1	2	3	<i>4</i>	5
2	Written communication	1	2	3	4	<i>5</i>
3	Proactiveness	1	2	3	<i>4</i>	5
4	Interaction ability with community	1	2	3	<i>4</i>	5
5	Positive Attitude	1	2	3	4	<i>5</i>
6	Self-confidence	1	2	3	4	<i>5</i>
7	Ability to learn	1	2	3	<i>4</i>	5
8	Work Plan and organization	1	2	3	<i>4</i>	5
9	Professionalism	1	2	3	<i>4</i>	5
10	Creativity	1	2	3	4	<i>5</i>
11	Quality of work done	1	2	3	4	<i>5</i>
12	Time Management	1	2	3	<i>4</i>	5
13	Understanding the Community	1	2	3	<i>4</i>	5
14	Achievement of Desired Outcomes	1	2	<i>3</i>	4	5
15	OVERALL PERFORMANCE	1	2	3	4	<i>5</i>

Evaluation by the Supervisor of the Intern Organization

Student Name: E. Maheswari	Registration No: 2035804006
Term of Internship: From: 17-11-2022 To: 28-02-2023	
Date of Evaluation: 26-04-2023	
Organization Name & Address: Sri Subramanyeswara lakshmi polymers	
Name & Address of the Supervisor with Mobile Number	V. Ashok Kumar.

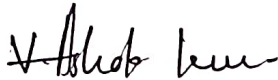

Please rate the student's performance in the following areas:

Please note that your evaluation shall be done independent of the Student's self-evaluation

Rating Scale: 1 is lowest and 5 is highest rank

1	Oral communication	1	2	3	4	5
2	Written communication	1	2	3	4	5
3	Proactiveness	1	2	3	4	5
4	Interaction ability with community	1	2	3	4	5
5	Positive Attitude	1	2	3	4	5
6	Self-confidence	1	2	3	4	5
7	Ability to learn	1	2	3	4	5
8	Work Plan and organization	1	2	3	4	5
9	Professionalism	1	2	3	4	5
10	Creativity	1	2	3	4	5
11	Quality of work done	1	2	3	4	5
12	Time Management	1	2	3	4	5
13	Understanding the Community	1	2	3	4	5
14	Achievement of Desired Outcomes	1	2	3	4	5
15	OVERALL PERFORMANCE	1	2	3	4	5

EVALUATION

Internal & External Evaluation for Semester Internship

Objectives:

- Explore career alternatives prior to graduation.
- To assess interests and abilities in the field of study.
- To develop communication, interpersonal and other critical skills in the future job.
- To acquire additional skills required for the world of work.
- To acquire employment contacts leading directly to a full-time job following graduation from college.

Assessment Model:

- There shall be both internal evaluation and external evaluation
- The Faculty Guide assigned is in-charge of the learning activities of the students and for the comprehensive and continuous assessment of the students.
- The assessment is to be conducted for 200 marks. Internal Evaluation for 50 marks and External Evaluation for 150 marks
- The number of credits assigned is 12. Later the marks shall be converted into grades and grade points to include finally in the SGPA and CGPA.
- The weightings for Internal Evaluation shall be:
 - Activity Log 10 marks
 - Internship Evaluation 30 marks
 - Oral Presentation 10 marks
- The weightings for External Evaluation shall be:
 - Internship Evaluation 100 marks
 - Viva-Voce 50 marks
- The External Evaluation shall be conducted by an Evaluation Committee comprising of the Principal, Faculty Guide, Internal Expert and External Expert nominated by the affiliating University. The Evaluation Committee shall also consider the grading given by the Supervisor of the Intern Organization.
- Activity Log is the record of the day-to-day activities. The Activity Log is assessed on an individual basis, thus allowing for individual members within groups to be assessed this way. The assessment will take into consideration

the individual student's involvement in the assigned work.

- While evaluating the student's Activity Log, the following shall be considered -
 - a. The individual student's effort and commitment.
 - b. The originality and quality of the work produced by the individual student.
 - c. The student's integration and co-operation with the work assigned.
 - d. The completeness of the Activity Log.
- The Internship Evaluation shall include the following components and based on Weekly Reports and Outcomes Description
 - a. Description of the Work Environment.
 - b. Real Time Technical Skills acquired.
 - c. Managerial Skills acquired.
 - d. Improvement of Communication Skills.
 - e. Team Dynamics
 - f. Technological Developments recorded.
